

BULK LIQUID WASTE SOLUTIONS

BENEFITS & SOLUTIONS

Benefits

- Quick deployment and setup onsite for liquid waste management
- Cost effective and convenient onsite storage of bulk fluids and slurries
- Allows for improved production time with limited downtime transporting liquid waste for disposal
- Clean, legal and safe onsite storage

Site Storage & Transport Solutions

- 20,000L ISO tanks used for both clean and dirty water
- 15,000, 20,000 and 35,000L bulk bins for onsite storage
- 20,000L semi vacuum tankers
- 35,000L B Double tankers used for transporting liquid waste

Patriot provides bulk liquid management for various liquid wastes including but not limited to:

- Oily sludge and waters
- Drill slurry, bentonites and muds
- Effluents, septic/sewage
- Hydrocarbon sludge
- Acid sulphates
- Leachates
- Biological wastes
- Bilge water and bulker wastes
- Contaminated waters
- Concrete slurry

The Patriot fleet of modern vacuum tankers range from 2,000L trucks for use in the domestic market, right up to 50,000L road trains which service mining, oil and gas industries for long haul camp and drill rig support. We compliment our liquid waste division by providing bulk potable and recycled water deliveries in combination with the supply of ISO storage tanks for safe on-site liquid storage solutions.
